Banking Management System

Create a banking management system where-

➔ **User**

1) Can create an account.
2) Can deposit and withdrawal amount.
3) Can check available balance.
4) Can transfer the amount from his account to another user account.
5) Can check transaction history.
6) Can take a loan from the bank twice of his total amount..

Note - User can only withdraw and transfer money from his account if he has money in his account.
If a user is unable to withdraw the amount of money he has deposited in the bank, he will get a message that the bank is bankrupt.

➔ **Admin**

1) Can create an account
2) Can check the total available balance of the bank.
3) Can check the total loan amount.
4) Can on or off the loan feature of the bank.
